

Chhay Ham

ABOUT ME

Results-driven **Platform Engineer** with a strong passion for **empowering developers** through **CI/CD best practices, Infrastructure as Code (IaC), and Configuration as Code**. Experienced in designing, automating, and maintaining scalable cloud infrastructure to optimize development workflows and enhance system reliability.

PROFESSIONAL EXPERIENCE

Sonos, Inc (March 2019 – August 2024)

Senior DevOps Engineer | Seattle, WA

- Designed and maintained **Terraform** and **Terragrunt** modules to provision AWS resources, including **EKS clusters, ArgoCD, DataDog monitoring, and network peering**.
- Automated **EC2 infrastructure management** using **Ansible** and optimized Kubernetes deployments via **Helm charts**.
- Developed and managed **CI/CD pipelines** for Docker image builds using **Jenkins (Groovy)** and **GitHub Actions**.
- Implemented **tiered infrastructure deployment workflows** using GitHub Actions, improving efficiency and scalability.

PACCAR ITD (via CyberCoders) (September 2018 – October 2018)

Cloud Engineer | Renton, WA

- Designed and implemented **AWS-based high-performance computing and machine learning environments**.
- Developed cloud storage solutions, integrating security best practices and compliance measures.
- Automated infrastructure provisioning and deployment using **VSTS and AWS CloudFormation**.

Amazon Web Services (AWS) | Commerce Platform (June 2017 – June 2018)

Systems Engineer | Seattle, WA

- Architected, deployed, and optimized AWS-hosted infrastructure to support **billing and commerce services**.
- Provided **operational support** for MySQL databases in **on-premises and AWS RDS environments**.
- Designed and maintained **Python-based monitoring applications** leveraging the Django framework.
- Mentored junior engineers, improving team efficiency and problem-solving capabilities.

Amazon Web Services (AWS) | Kinesis Streams (March 2017 – June 2017)

Systems Engineer | Seattle, WA

- Automated **operational tasks** with custom-built system management tools.
- Supported the launch of **Kinesis Streams services** in new AWS regions.
- Managed infrastructure in **AWS GovCloud (ITAR-compliant environment)**.

Amazon Web Services (AWS) | Kinesis Streams (August 2016 – March 2017)

Support Engineer | Seattle, WA

- Provided **operational support** for large-scale distributed systems.
- Assisted in launching Kinesis Streams in new AWS regions.
- Conducted **AWS GovCloud** system administration.

Amazon Web Services (AWS) | EC2 (September 2015 – August 2016)

Support Engineer | Seattle, WA

- Mentored new engineers in the **AWS Intelligence Initiative program**.
- Supported **new AWS region deployments** as a build engineer.

Amazon | North America Fulfillment Centers (October 2014 – September 2015)

IT Support Engineer II | Sumner, WA

- Managed **large-scale IT infrastructure projects** across North American fulfillment centers.
- Provided Tier 1 support for **Kiva Mobile Fulfillment Systems**.

Amazon | North America Fulfillment Centers (February 2013 – October 2014)

Sr. IT Technician | Sumner, WA

- Provided **IT support for fulfillment center operations**, troubleshooting critical infrastructure issues.
- Led **small to mid-sized IT projects**, collaborating with cross-functional teams.

TECHNICAL SKILLS

DevOps, SRE	Cloud Platforms	Programming
CI/CD (Jenkins, GitHub Actions)	AWS (EKS, EC2, RDS)	Go, Python, JavaScript
Kubernetes	Terraform, Ansible	Helm, Groovy
Infrastructure as Code	DataDog, PagerDuty	Agile, Git, Akamai

EDUCATION & CERTIFICATIONS

Associate of Applied Technology, Computer Networking & Information Systems Security

Clover Park Technical College, Lakewood, WA (2011)

KEY HIGHLIGHTS

- **8+ years** of experience in **DevOps, platform engineering, and cloud infrastructure.**
- Extensive expertise in **AWS, Kubernetes, Terraform, and CI/CD automation.**
- Strong background in **mentoring and training junior engineers.**
- Proven ability to **optimize infrastructure, improve system reliability, and automate complex workflows.**
